YAMAMOTO

CORPORATE PROFILE

JAPAN, THAILAND, INDIA, QATAR*, USA*

洞察/Insight

Rio Kawaguchi

CEO of Do-Yamamoto

Post pandemic the frugal economic sector is optimistic true to the Japanese ethos of optimism and our ‘DO’ attitude, the team visions to continue to be an important market player in the EPC section, and deliver compelling results in the Direct-to-consumer market. With increasing risk of climate change, Geo-political conflict, and macroeconomic volatility, I envision to create a holistic environment where the top line is steady with a mindful societal impact and reduce the GHG emissions within the nation’s growth strategy.

In the advent of globalization with localization in mind and focused on mutual government agenda, our subsidiary office in India will be a start point for current market requirement and continue to expand the same to a manufacturing hub as to sustain future and current market. With this vision and clarity, proud to invite our customers to experience better engineering and to a way forward to create a more sustainable way of purchase.

Our Goals

When Yamaoto Started Trading in 1959 it was to fill the GAP of quality rubber hoses among other things like leather to the industrial sector of Japan. As the demand increased with the advent of quality mass industrilisation, the demand for Rubber hoses quad-tripled, this came the partnership with Bridgestone 2008 and the establishment of two factories in Kansai and Osaka. Post the success of various Design to engineering projects with the oldest EPC partner from Japan the company established the international business division along with the domestic division.

The international division with its list of enviable list of OEM’s and spread of different vendors we able to achieve 102 unique projects in the most effective, efficient and economical way. So we just don’t cater to the needs of the epc but the end user as the respective engineering team in consulation with the Supply chain team of the end user has understood the importance of unique specification and the long term impact on the reduced downtime.

1959

President Teiji Yamamoto incorporated Yamamoto Industry company =- Tokyo

1990

Industrial unit and Branch in Kansai

2008

DO-YAMAMOTO Co. LTD, named along with the BRIDGESTONE PARTNERSHIP-2008

2015

Recognized by Major Oil and gas EPC's with design to engineering deliveries reaching 1000 plus deliveries

2020

Continuous Innovations resulting in various OEM's across, entrant to the Military sector, plus branch in Thailand, Subsidiary in India, LLC in Qatar and Representative office in USA

Statement

Purpose

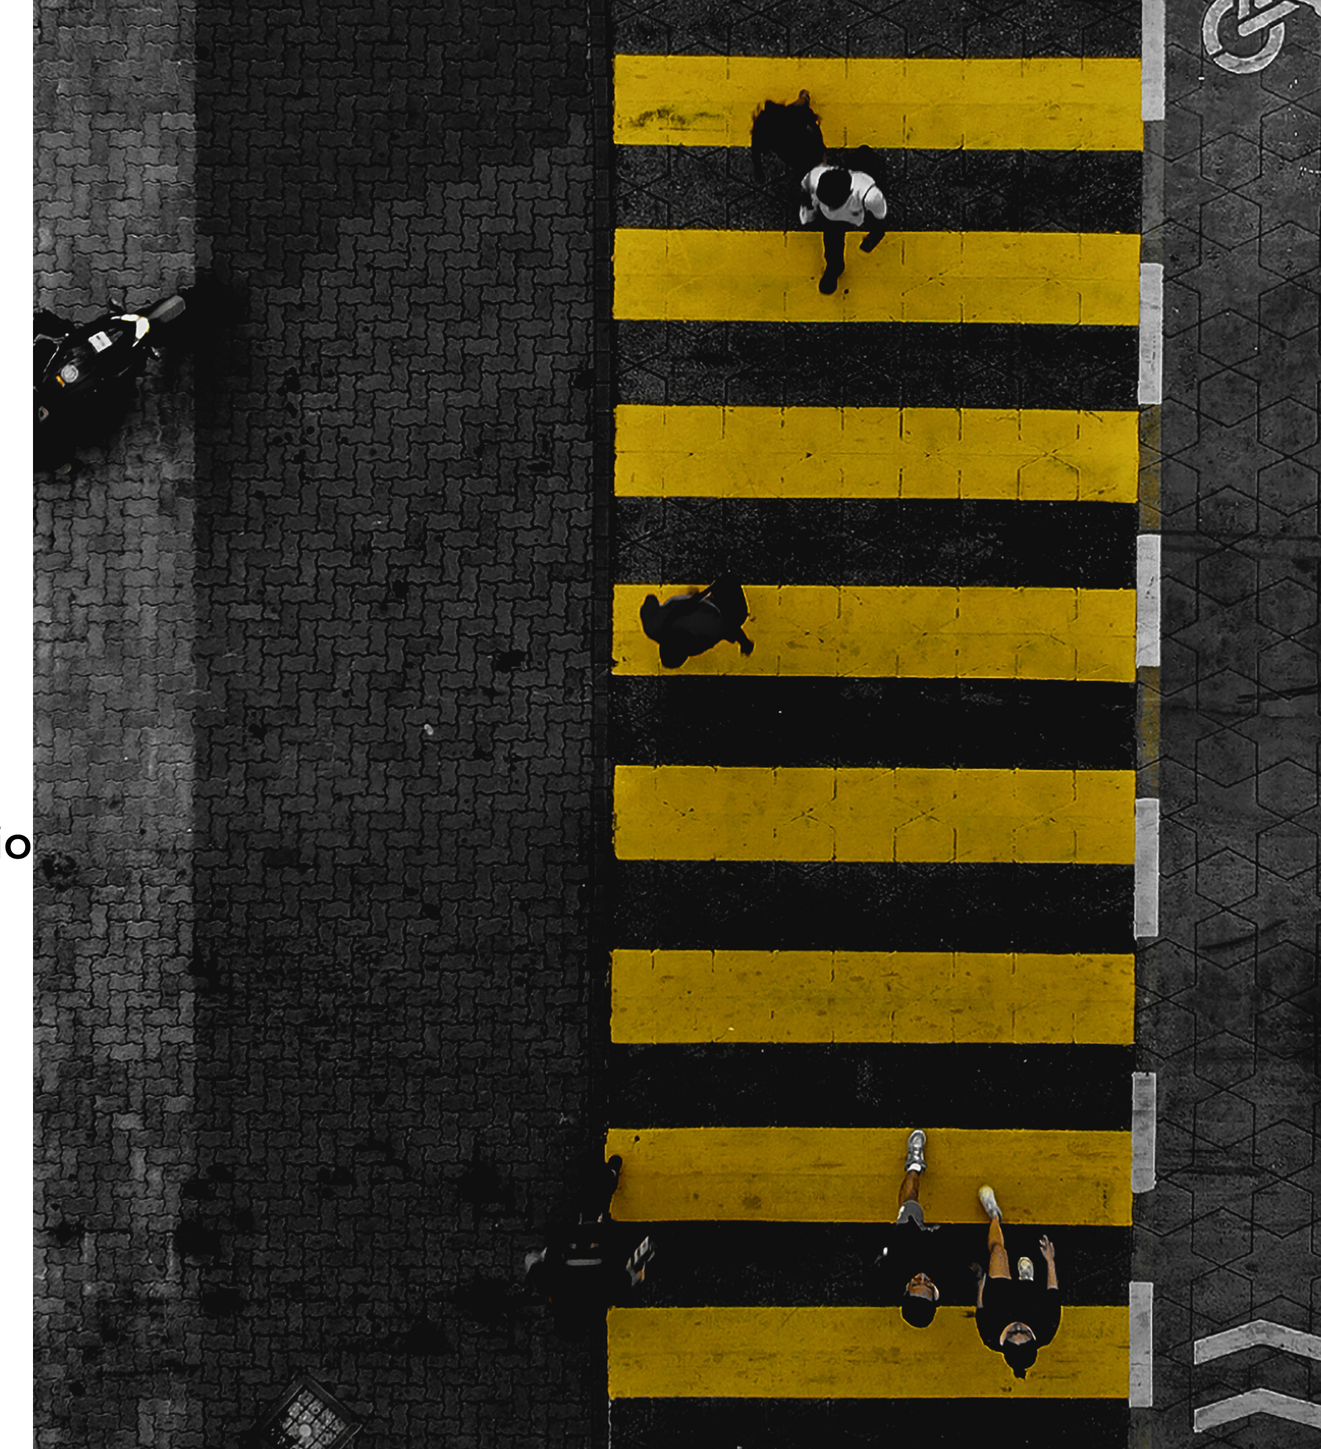

To Process sales of high pressure hose products, industrial hose products, plastic products, other industrial materials, accessories, assembiles etc

Mission

To create the best customer specific product/ portfolio as to achieve the highest customer ROI.

Vision

To help B2B customers from every industry with the supply of high performance rubber products/Assemblies/Couplers and assist with its associated problem solving.
